ABOUT ME

I am an undergraduate informatics student interested in learning something new. I can work

together as a team and follow the prescribed procedures. I never give up in overcoming a problem.

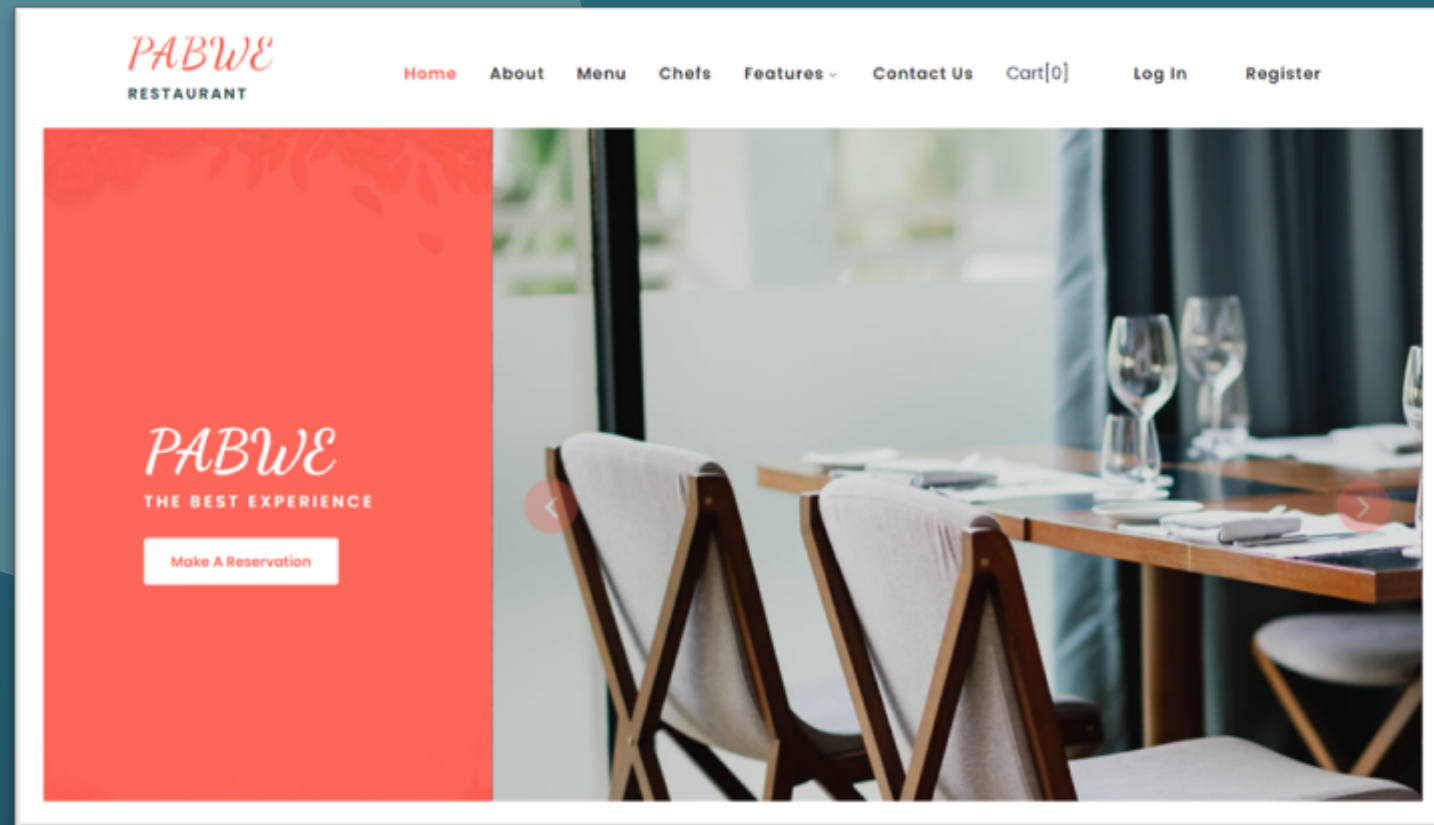

Educational Background

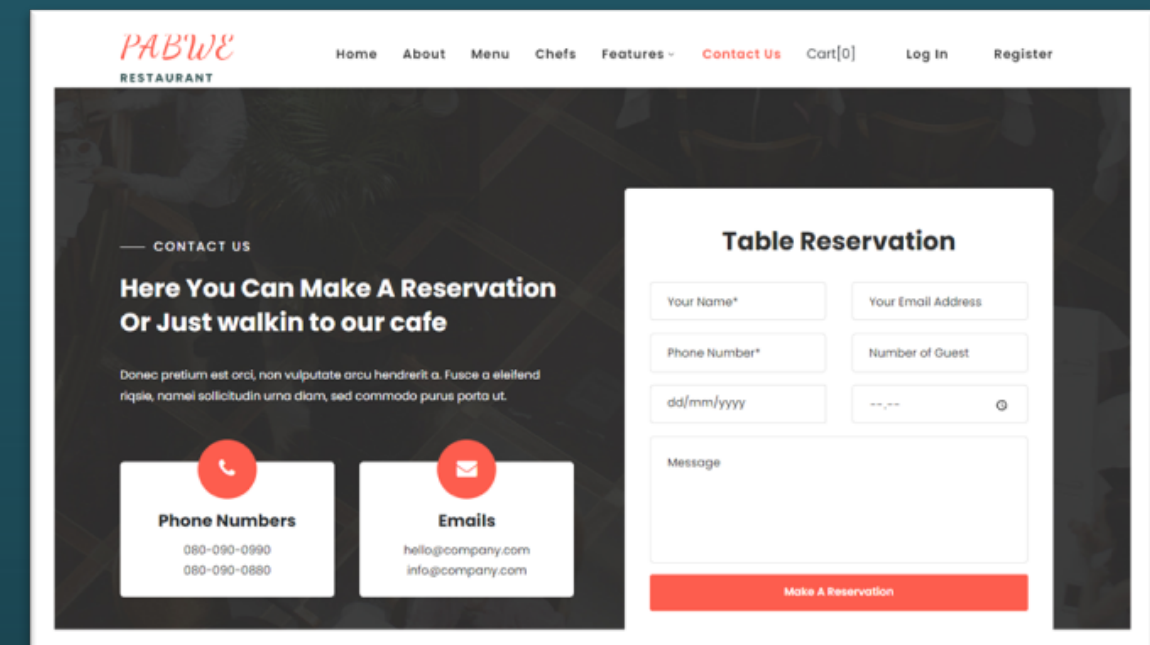

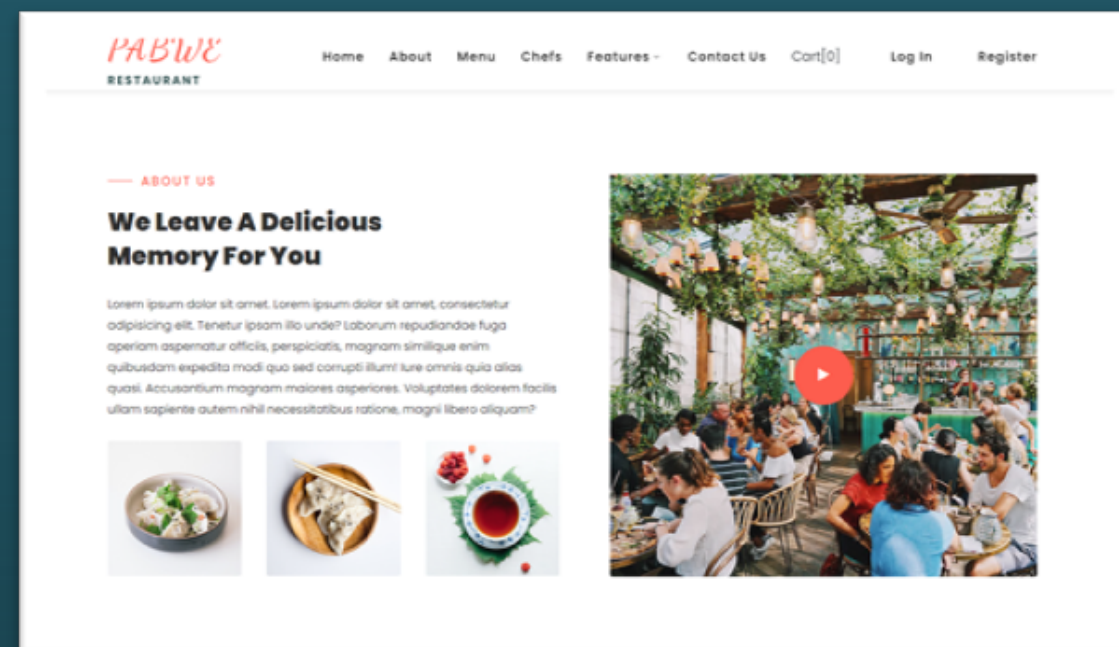

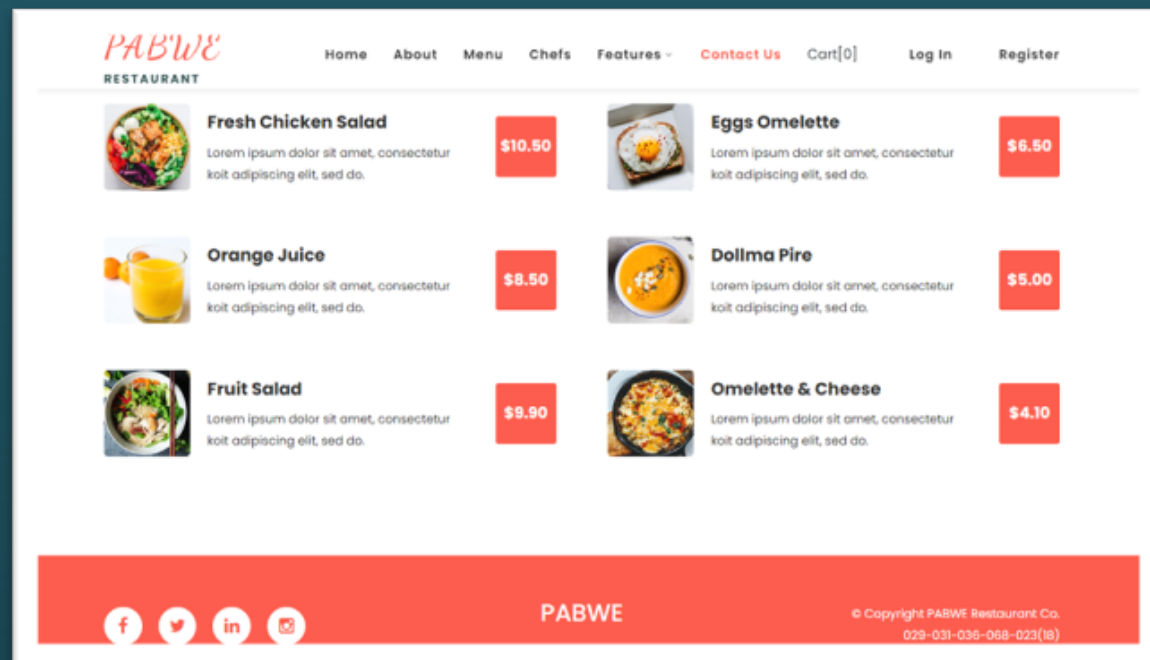

Del Institute of Technology
2018 - 2022
Informatic Engineering

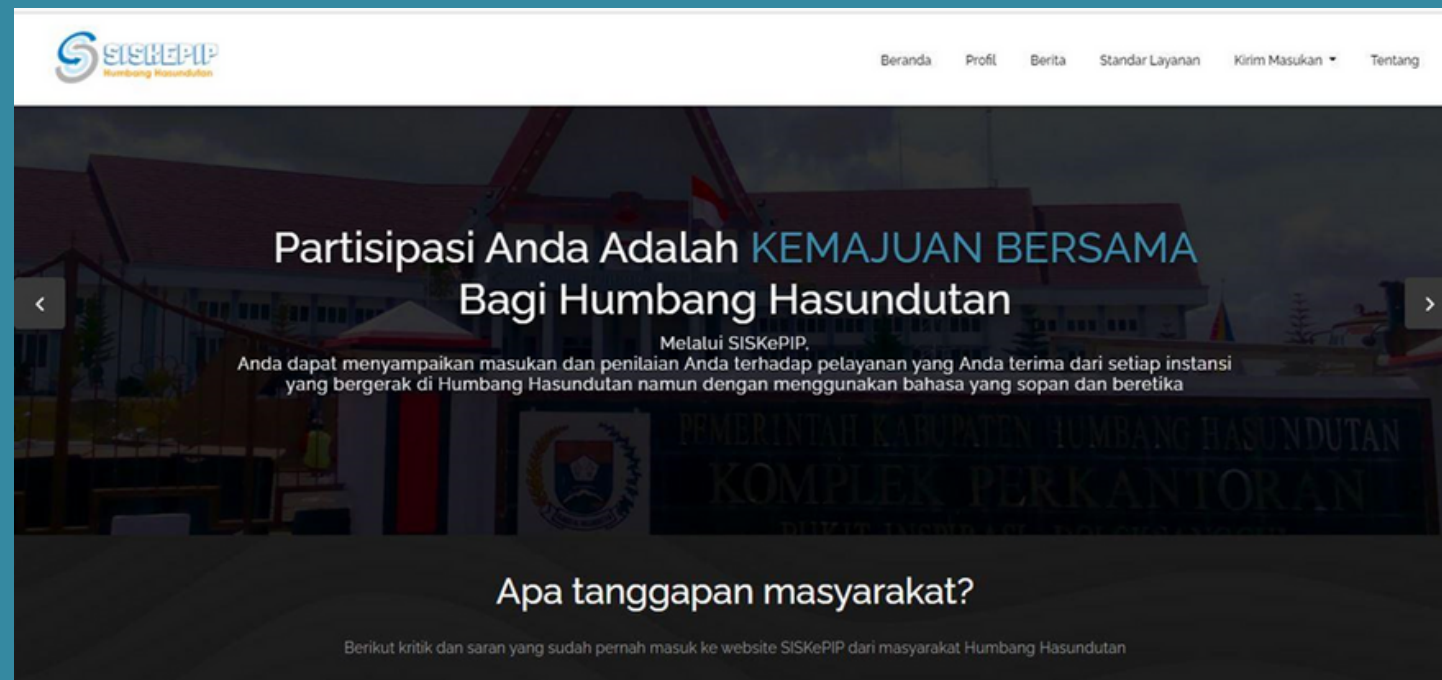

E -restaurant - web application

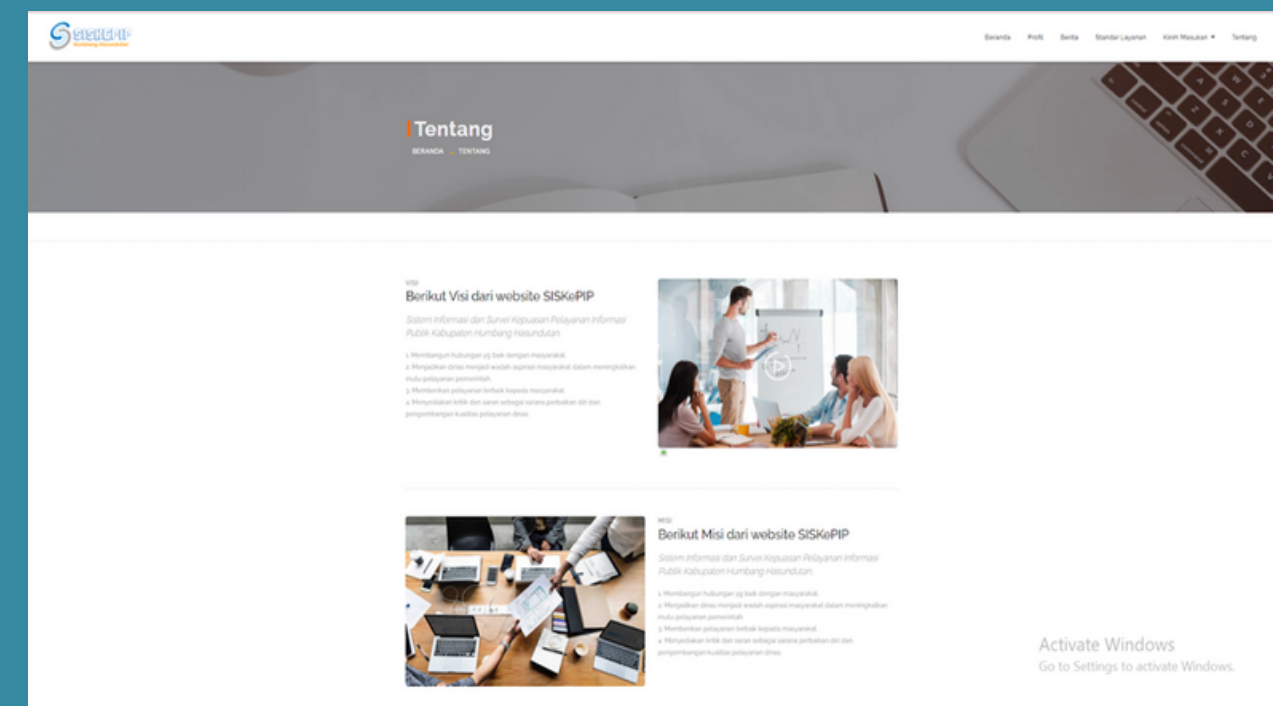

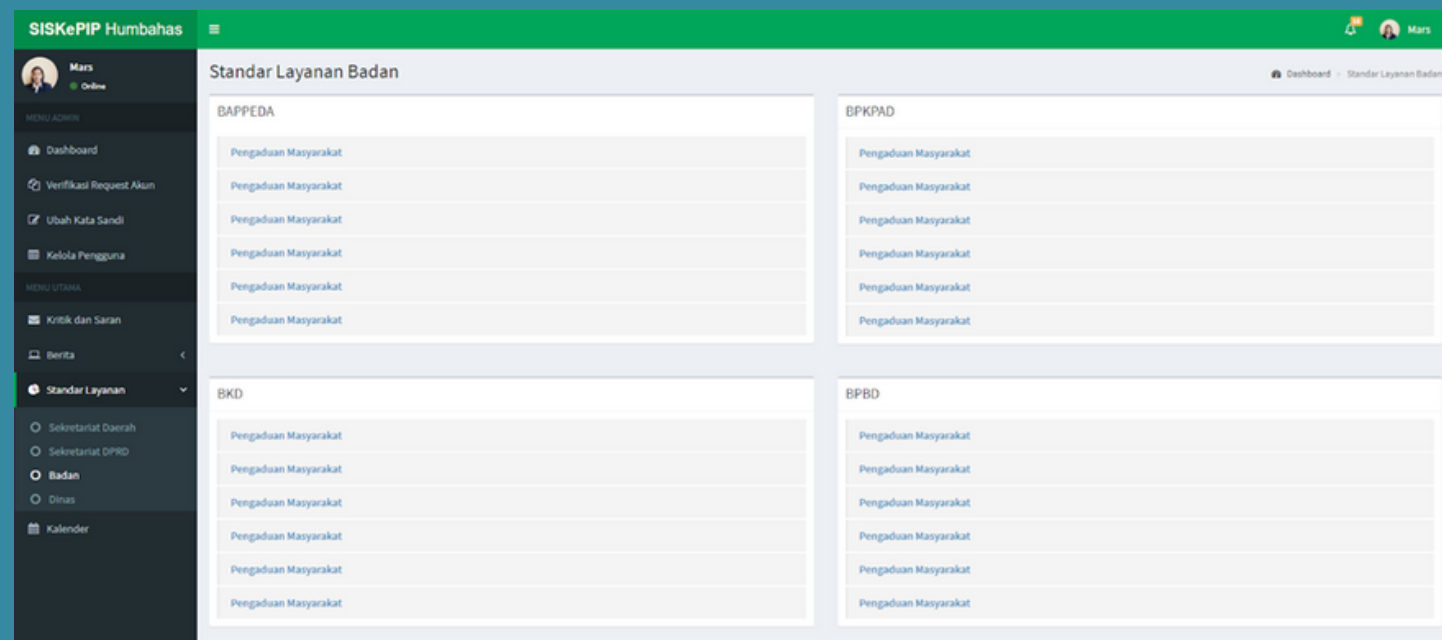

My team and I developed E-Restaurant website using Laravel framework.

SISKePIP - public information website

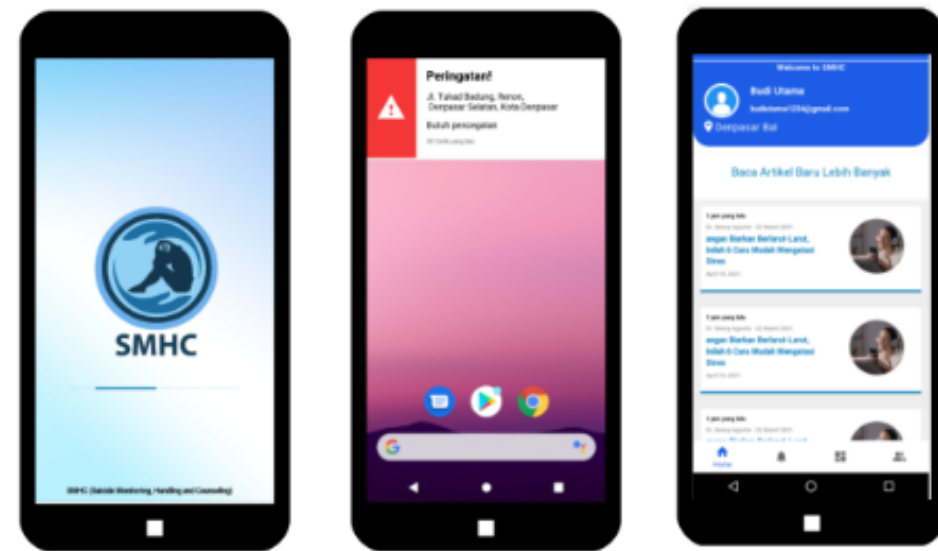

Collaborate with my team to developed a website for public information, SISKePIP (Sistem Informasi Survey Kepuasan Pelayanan Informasi Publik)

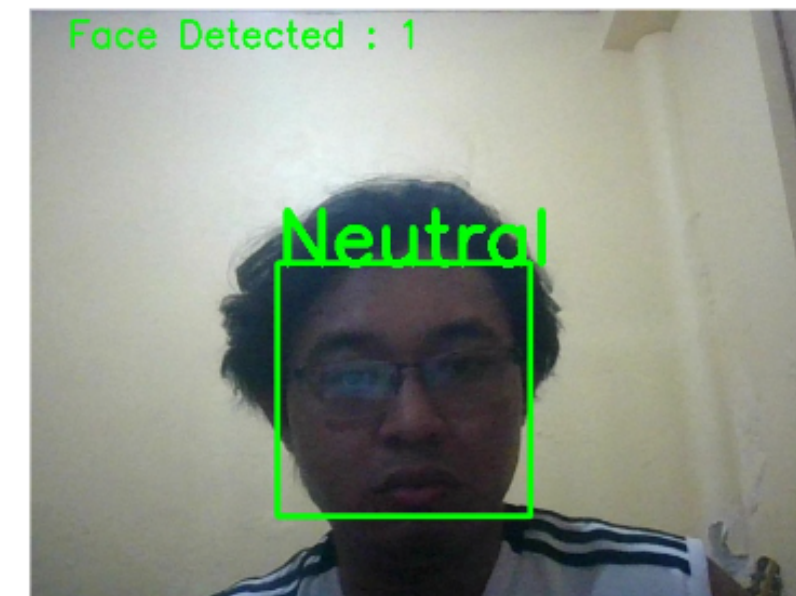

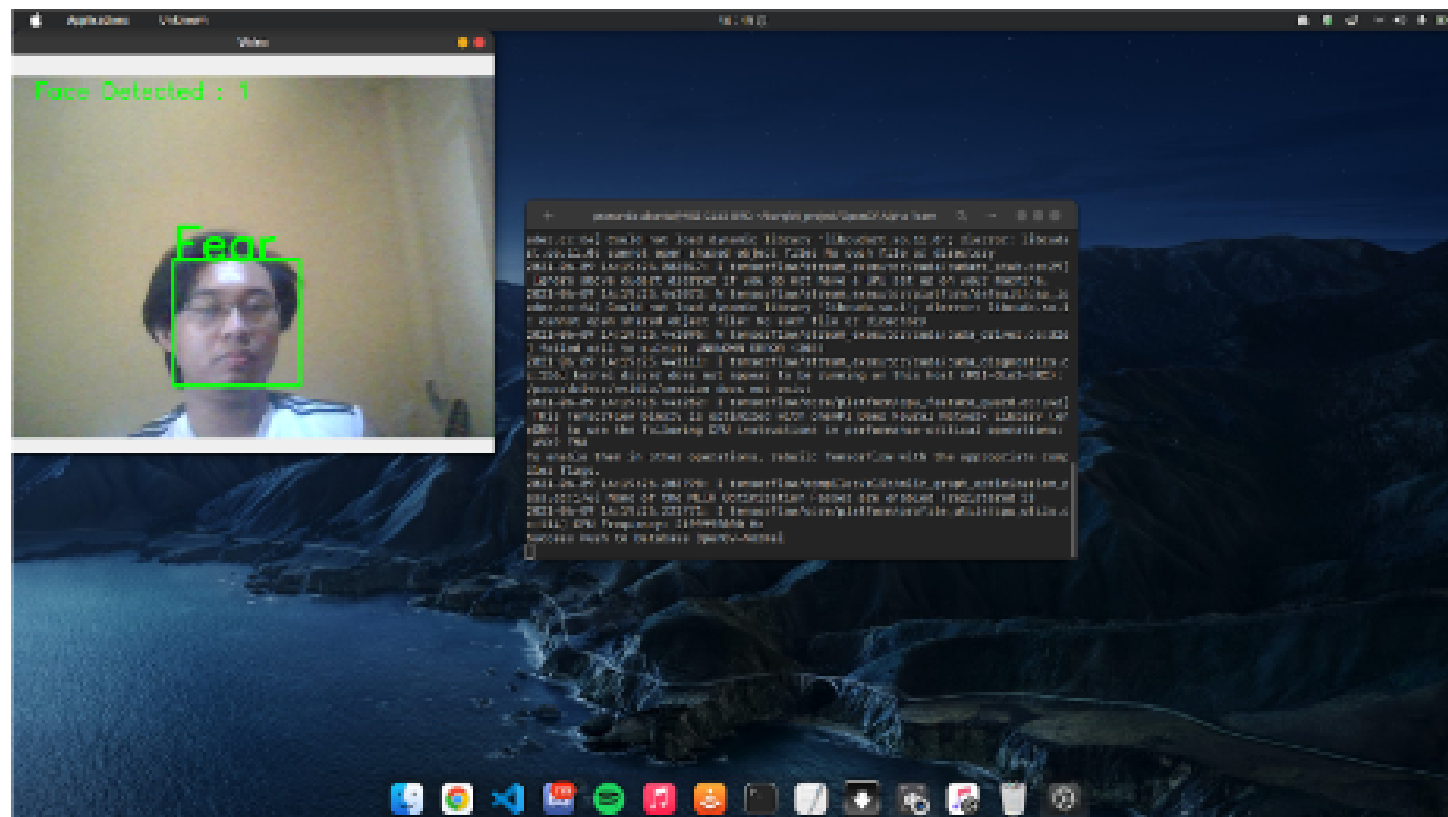

SMHC - Capstone project Bangkit academy

SMHC (Suicide Monitoring, Handling and Counseling) is a system that uses CCTV cameras that located in high risk locations to detect people facial expression if they have a potential to commit suicide.

Screenshots of your app

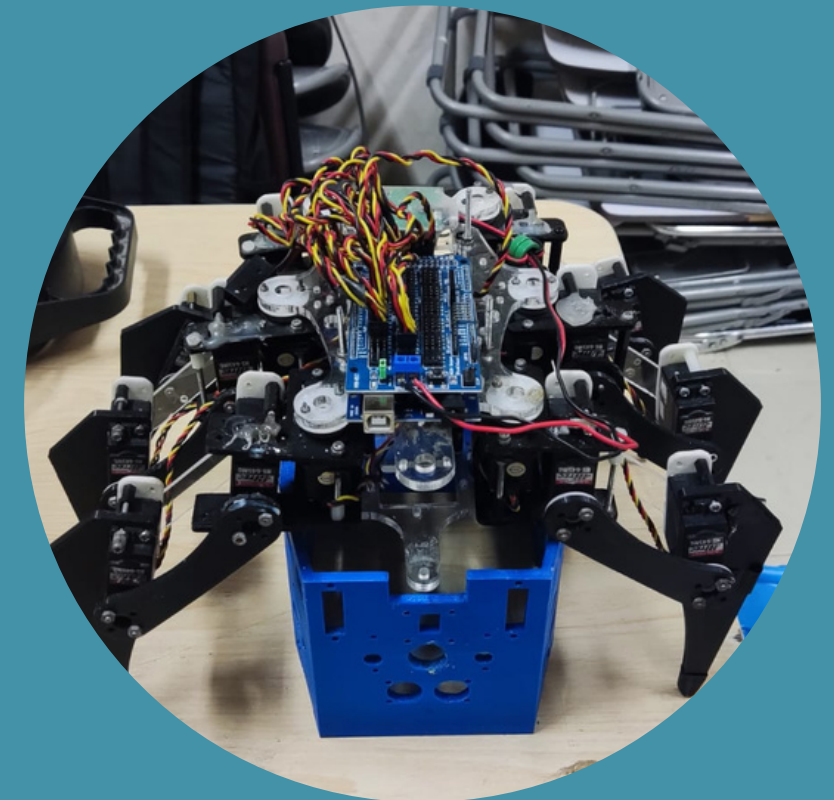

Expression detection using machine learning

If the system detects a facial expression that correlated with suicide, it will send notification to the SMHC App of nearby users so they can help.

National Robotic Competition

My team and I participated in a national robot competition specializing in fire fighting robots as a simulation for fire fighting.

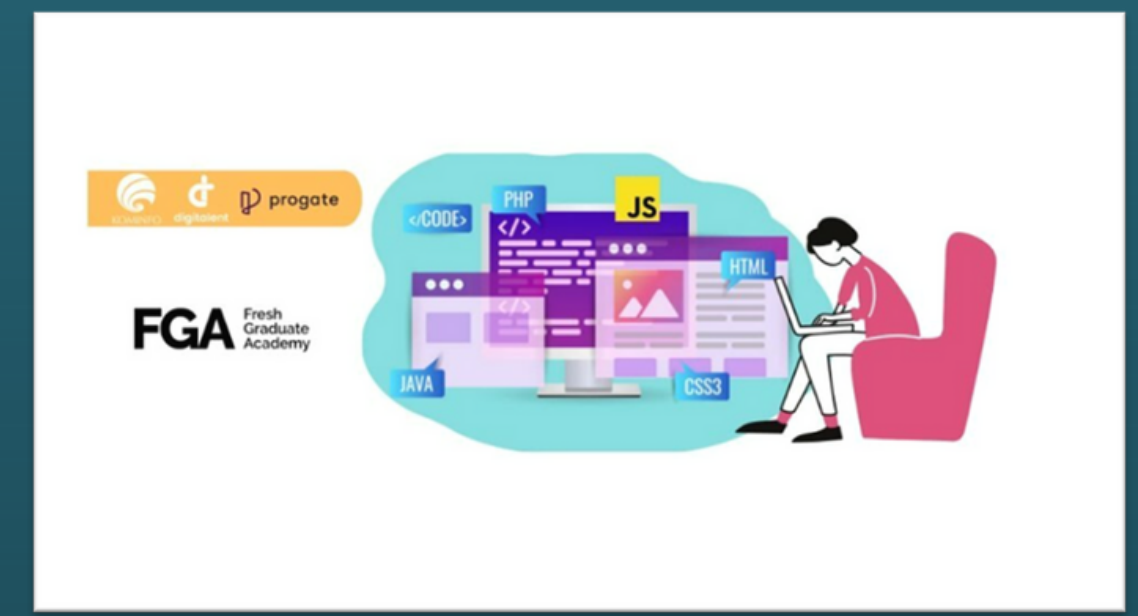

Other Experience

Bangkit Academy
Machine Learning Student
